REHABILITATION OF SECTION OF US ROUTE 3 IN TILTON
INCLUDES NEW SIDEWALK AND DRAINAGE WORK

The New Hampshire Department of Transportation announces construction work is scheduled to begin the week of April 26, 2004 on the rehabilitation of a section of US Route 3 in Tilton west of Exit 20.

This project includes rehabilitating approximately 1,700 feet of US Route 3 between Maher's Welding and the Agway Store. Also included is the addition of a sidewalk on the west side of US 3 and drainage work.

Motorists traveling on US Route 3 in Tilton can expect periods of one-way alternating traffic during May. Uniformed officers will help guide traffic through the work zone.

Weaver Brothers Construction Co. Inc. of Bow, New Hampshire is the prime contractor for the \$665,000 project, which has a completion date of July 23, 2004.
